

North American Charter[®] Plus 10

Annuity Disclosure Statement

Thank you for your interest in the North American Charter[®] Plus 10 Annuity from North American Company for Life and Health Insurance[®]. It is important for you to read and understand this summary before you decide to purchase the annuity. This summary will help you understand the features of the annuity and determine if it will help you meet your financial goals. Once you have read this summary, please sign pages 8 and 10 to confirm that you understand the annuity and submit this document with your application for the annuity. *Refer to the Contract for complete details.*

This Annuity Disclosure Statement must be signed by the applicant and agent, then return the Home Office copy to North American Company for Life and Health Insurance, Annuity Division with the application.

8300 Mills Civic Pkwy, West Des Moines, IA 50266
Phone: (866) 322-7065 • NorthAmericanCompany.com

The North American Charter[®] Plus 10 is issued on form NC/NA1007A, ICC16-NA1007A.MVA (certificate/contract), AE576A/ICC16-AE600A, AE577A/ICC15-AE577A, AE578A/ICC16-AE578A, AE580A.PB/ICC16-AE580B.PB, AE581A/ICC15-AE581A, AE582A/ICC15-AE582A, AE583A/ICC15-AE583A, AE584A/ICC15-AE584A, AE585A/ICC15-AE585A, AE586A/ICC15-AE586A and AE587A/ICC15-AE587A (riders/endorsements) or appropriate state variation by North American Company for Life and Health Insurance[®], West Des Moines, IA. This product, its features and riders may not be available in all states.

The North American Charter® Plus 10 is a flexible premium deferred fixed index annuity from North American Company for Life and Health Insurance® that offers a 6% premium bonus on all premiums received in the first seven years. The North American Charter Plus 10 accumulates interest in the following ways: A) based on the change in the Index Account during each contract year, without the risk of losing premium due to market volatility, and/or B) a traditional Fixed Account.

Fixed Account

The portion of premium allocated to this account will earn the current Fixed Account interest rate. This rate will be guaranteed for the first contract year and the rate for future contract years will be declared annually thereafter at the Company's discretion. This rate will never fall below the Minimum Guaranteed Fixed Account Interest Rate of 0.25%. *Ask your sales representative for the current interest rate.*

Index Account

The Index Account is the portion of your premium that you determine will earn interest based on one or more of the following crediting methods:

- Annual Point-to-Point Crediting Method with Index Cap Rate
- Annual Point-to-Point Crediting Method with Index Margin
- Annual Point-to-Point Crediting Method with Participation Rate
- Daily Average Crediting Method with Index Margin
- Monthly Point-to-Point Crediting Method with Index Cap Rate
- Two-Year Point-to-Point (also known as Term Point-to-Point) with Index Margin (not available in all states)

Please see the North American Charter Plus 10 product brochure for specific details regarding these crediting methods.

Ask your sales representative for the current Index Cap Rates, Index Margins, and Participation Rate.

Index Margin

The Index Margin is subtracted from any index gain to determine any Interest Credit. For the Daily Average with Index Margin and the Annual Point-to-Point with Index Margin Index Accounts, the Index Margin is subtracted on each contract anniversary. It is guaranteed for the first year and declared annually thereafter at the Company's discretion. For the Two-Year Point-to-Point with Index Margin Index Account, the Index Margin is multiplied by two (which is the term length) and then subtracted at the end of each two-year term. It is declared at the beginning of and guaranteed for each two-year term. The maximum Index Margin is 25% for the Daily Average with Index Margin Index Account and 15% for the Annual Point-to-Point with Index Margin Index Account and the Two-Year Point-to-Point with Index Margin Index Account.

Index Cap Rate

The Index Cap Rate is an upper limit used to determine Interest Credits. The Index Cap Rate applies to the Annual Point-to-Point and Monthly Point-to-Point Index Account options. It will always be declared on the contract anniversary by the Company at their discretion and is guaranteed for the following contract year. This cap may change annually. However, at no time will this cap ever fall below the minimum guarantees which are: 0.50% for the Annual Point-to-Point with Cap Index Account and 0.25% for Monthly Point-to-Point with Cap Index Account.

Participation Rate

The Participation Rate is the percentage of any index gain that will be credited to the Contract as the Interest Credit to the Annual Point-to-Point Index Account. The rate is guaranteed for the first year and declared annually thereafter at the Company's discretion, never to be less than 5% for Annual Point-to-Point with Participation Rate Index Account.

Payment of Commission

North American will pay a sales commission in connection with the sale of this product. This commission is one of many costs which North American considers and factors into the product's design and policy performance, including setting the guaranteed rates in the Contract and the manner in which non-guaranteed benefits may be offered. One-hundred percent of your premium deposit will be credited to your account, and no deductions from your premium payment or from your account value will be made due to the payment of this sales commission.

North American may enter into written sales agreements with other financial institutions ("selling firms") for the sale of the Contract. The selling firms and their representatives are independent of North American. In this case, the selling firms are responsible for evaluating product proposals or recommendations independently and for exercising independent judgment about these proposals. North American pays selling firms all or a portion of the commissions received for their sales of the Contract.

Accumulation Value

Your Accumulation Value is equal to 100% of premium, plus any applicable premium bonus, plus any fixed and index account interest earned, minus withdrawals. The Accumulation Value is used to determine the Death Benefit as well as penalty-free withdrawals.

Surrender Value

The Surrender Value is the amount that is available at the time of surrender. The Surrender Value is equal to the Accumulation Value, subject to the Market Value Adjustment (if any), less applicable Surrender Charges and Premium Bonus Recapture, and less state premium taxes where applicable. The Surrender Value will never be less than the minimum requirements set forth by state laws, at the time of issue, in the state where the Contract is delivered.

The Minimum Surrender Value will never be less than 87.5% of all premiums less any surrenders (after Market Value Adjustment or reduction for Surrender Charges and premium bonus recapture); accumulated at 1.00%, or otherwise directed by your Contract.

SURRENDER CHARGES, PREMIUM BONUS RECAPTURE AND MARKET VALUE ADJUSTMENT

Please read the following information and sign the last page of this disclosure to acknowledge your understanding that Surrender Charges, Premium Bonus Recapture and Market Value Adjustments will apply when withdrawals are taken from your Contract during the Surrender Charge Period.

Surrender Charges

A Surrender Charge is assessed on any amount withdrawn, whether as a partial withdrawal or full surrender, that is in excess of the applicable penalty-free amount. A surrender during the Surrender Charge period may result in a loss of premium.

The Surrender Charges that apply for each Contract Year are based on the state where your Contract is issued and are shown as follows:

For contracts issued in **all states** other than those specifically listed below:

Year 1	Year 2	Year 3	Year 4	Year 5	Year 6	Year 7	Year 8	Year 9	Year 10
10%	10%	9%	9%	8%	8%	7%	6%	4%	2%

For **California** issued contracts, the Surrender Charges are as follows:

Year 1	Year 2	Year 3	Year 4	Year 5	Year 6	Year 7	Year 8	Year 9	Year 10
8%	7.45%	6.5%	5.5%	4.55%	3.55%	2.55%	1.5%	0.5%	0.44%

The Surrender Charge percentage in the 10th contract year will decrease 0.04% monthly until the surrender charge equals 0.00%. The decrease will occur on the same day in each month as the date of the contract anniversary; if the date does not exist for a given month, the date for that month will be the last calendar day of the month.

For **Alaska, Connecticut, Delaware, Hawaii, Idaho, Minnesota, Missouri, Nevada, New Jersey, Ohio, Oklahoma, Oregon, Pennsylvania, South Carolina, Texas, Utah, Virginia and Washington** issued contracts, the Surrender Charges are as follows:

Year 1	Year 2	Year 3	Year 4	Year 5	Year 6	Year 7	Year 8	Year 9	Year 10
9%	8.5%	7.5%	6.5%	5.5%	4.5%	3.5%	3%	2%	1%

Surrender Charges allow the Company to invest long-term, and in turn, generally credit higher yields.

Surrender Charges and Market Value Adjustments on IRS-Required Minimum Distributions that exceed the 10% penalty-free amount are waived by current company practice*.

**A feature offered "by current company practice" is not a contractual guarantee of this annuity Contract and can be removed or changed at any time.*

See next page for Premium Bonus Recapture and Market Value Adjustment.

Premium Bonus Recapture

During the surrender charge period, withdrawals in excess of the penalty-free amount or a full surrender will incur a premium bonus recapture charge as outlined below. This premium bonus recapture amount is in addition to any applicable Surrender Charges and/or Market Value Adjustments. There is no premium bonus recapture in the event of death. No premium bonus recapture will occur on any penalty-free withdrawal amount, Required Minimum Distributions (by current company practice*) or under the Nursing Home Confinement Waiver.

For contracts issued in **all states** other than those specifically listed below:

Year 1	Year 2	Year 3	Year 4	Year 5	Year 6	Year 7	Year 8	Year 9	Year 10
100%	90%	80%	70%	60%	50%	40%	30%	20%	10%

For **California** issued contracts, the Premium Bonus Recapture charge is as follows:

Year 1	Year 2	Year 3	Year 4	Year 5	Year 6	Year 7	Year 8	Year 9	Year 10
75%	75%	65%	55%	45%	40%	30%	20%	10%	0%

For **Alaska, Connecticut, Delaware, Hawaii, Idaho, Minnesota, Missouri, Nevada, New Jersey, Ohio, Oklahoma, Oregon, Pennsylvania, South Carolina, Texas, Utah, Virginia and Washington** issued contracts, the Premium Bonus Recapture charge is as follows:

Year 1	Year 2	Year 3	Year 4	Year 5	Year 6	Year 7	Year 8	Year 9	Year 10
90%	85%	80%	70%	60%	50%	40%	30%	20%	10%

A 6% Premium Bonus applies to premiums received in the first seven contract years.

**A feature offered "by current company practice" is not a contractual guarantee of this annuity Contract and can be removed or changed at any time.*

Market Value Adjustment

The North American Charter Plus 10 includes a Market Value Adjustment that is applied only during the Surrender Charge period to full surrenders and to any partial surrender in excess of the applicable penalty-free partial surrender amount. This adjustment may decrease or increase the Surrender Value depending on the change in the Index Value of the Market Value Adjustment External Index since you purchased this annuity.

Example of Market Value Adjustment (MVA) Formula

The Market Value Adjustment will be calculated by multiplying the portion of any full or partial surrender that exceeds any available penalty-free withdrawal amount before the reduction for any Surrender Charge by the formula* described below.

*The Market Value Adjustment Factor is: $(i_0 - i_t - ADJ) \times (T)$

i_0 = The Index Value of the Market Value Adjustment External Index on the issue date of the annuity Contract.

i_t = The Index Value of the Market Value Adjustment External Index at the time of partial or full surrender.

ADJ = 0.005 (in **all states** other than those specifically noted otherwise below)

= 0.000 (in the following states: **AK, CT, DE, FL, HI, ID, IN, MD, MN, MO, MS, NJ, NV, OH, OK, OR, PA, SC, TX, UT, VA, WA**)

T = Time in years as follows: number of days from the date of the partial or full surrender to the end of the current contract year divided by 365; plus whole number of years remaining in the market value adjustment period.

In all states except California, the amount of the Market Value Adjustment will never exceed the lesser of a) the total interest credited to the Accumulation Value since issue, less the sum of the absolute values of all Market Value Adjustments on prior partial surrenders (i.e. all adjustments positive or negative added together), or b) the applicable Surrender Charge.

In California, the amount of the Market Value Adjustment will never exceed the lesser of a) the applicable Surrender Charge or b) 0.50% of the Accumulation Value at the time of the surrender.

See the "Understanding the Market Value Adjustment" brochure for more information.

Transfer Options

You may elect to transfer your values between the Fixed Account and Index Account options. You may also elect to transfer between crediting methods within the Index Account options on an annual basis for all annual crediting method options or at the end of each two-year term for the two-year crediting method. By current company practice*, you will have 30 days following each contract anniversary to reallocate. Transfers are not allowed until your first contract anniversary. Based on current tax laws, transfers between options will not be taxable or subject to surrender penalties. *Please refer to your North American Charter Plus 10 Additional Benefits Specifications Page, found in your Contract, for minimum transfer amounts.*

Death Benefit

The Death Benefit is payable upon the death of the first owner, unless the sole beneficiary is the owner's spouse and he or she elects to continue this contract under its spousal continuance provisions. If there are joint annuitants, and an annuitant who is not also the contract's owner dies, the death benefit will be paid upon the death of the second annuitant.

The Death Benefit equals the Accumulation Value or the Minimum Surrender Value as defined in the contract, whichever is greater. The beneficiary may choose to receive the Death Benefit in either a lump sum or a series of income payments.

A death benefit is not available if an annuity payout option has been elected.

Subsequent Premiums

All subsequent premiums will be credited a fixed interest rate until the next contract anniversary. This interest rate will be declared at the time the subsequent premium is received. On each contract anniversary, North American will allocate any premium received since the prior contract anniversary according to your most recent instructions. Subsequent premiums added during the first seven contract years will receive a premium bonus; the premium bonus percentage is determined by your initial premium. We reserve the right to limit or stop accepting additional premiums into this Contract.

LIQUIDITY FEATURES

Certain withdrawals before age 59½ may be subject to a 10% IRS penalty.

Penalty-Free Withdrawals

Once per year after the first contract anniversary, you may take a penalty-free withdrawal (also known as a Penalty-Free Partial Surrender), without Surrender Charges, Premium Bonus Recapture or Market Value Adjustment, of up to 10% of your Accumulation Value.

Nursing Home Confinement Waiver

(Not available in all states)

After the first contract anniversary, if the annuitant becomes confined to a qualified nursing home facility for at least 90 consecutive days, we will increase the available penalty-free withdrawal to 100% of the Accumulation Value. If you choose to withdraw 100% of your Accumulation Value your Contract will terminate. This waiver is automatically included with your annuity at no additional charge.

Required Minimum Distributions

By current company practice*, Required Minimum Distributions (RMD) that exceed the 10% penalty-free amount may be withdrawn without a Surrender Charge, Premium Bonus Recapture or Market Value Adjustment.

Annuity Payout Options

In all states except Florida, you may select an annuity payout option at any time. If selected during the surrender charge period, your payout will be based on the Surrender Value. Available payout options include Life Income, Life Income with Period Certain, Joint and Survivor Life Income and Income for a Specified Period or Amount.

By current company practice* you may receive an income from the Accumulation Value after the first contract year (without Surrender Charges, Premium Bonus Recapture or Market Value Adjustment) if you choose a Life Income Option. You can also receive an income based on the Accumulation Value if your annuity has been in force for at least five years and you elect to receive payments over at least a five-year period.

For Florida:

You may select an annuity payout option based on the Accumulation Value at any time after the first contract year. Available payout options include Life Income, Life Income with a 10-Year or 20-Year Period Certain, Joint and Survivor Life Income and Joint and Survivor with a 10-Year or 20-Year Period Certain.

Once a payout option is elected it cannot be changed and all other rights and benefits under the annuity end.

**A feature offered "by current company practice" is not a contractual guarantee of this annuity Contract and can be removed or changed at any time.*

Additional Information

The North American Charter Plus 10 is not a registered security, does not directly participate in stock or equity investments. Applicable index returns do not include dividends. Past index performance is not intended to predict future performance. Under current law, annuities grow tax-deferred. Annuities may be subject to taxation during the income or withdrawal phase. The tax-deferred feature is not necessary for a tax qualified retirement account. If purchasing this annuity as a qualified retirement account, you should consider whether other features, such as the Death Benefit, lifetime annuity payments and other riders will help meet your needs. Before purchasing this Contract you should obtain competent advice as to tax treatment of the Contract. Neither North American, nor any agents acting on its behalf in the sale of this product, should be viewed as providing legal, tax or securities advice.

Index Account Calculations

The following hypothetical examples are provided as a general explanation of how the Annual Point-to-Point with Index Cap Rate crediting method is calculated and how interest may be credited under three scenarios. These examples assume: initial premium of \$100,000 and a Premium Bonus of 6% (such that the current Index Account Value is \$106,000), a beginning index value of 1000 for the S&P 500®, an Annual Point to Point Index Cap Rate of 5% and no withdrawals.

Annual Point-To-Point With Index Cap Rate (APP Cap) Crediting Method

This crediting method measures the index growth using two points in time in the contract year; the beginning index value and the ending index value. The index return is calculated based on the difference between these two values. The index return, if positive, is then subject to an Index Cap Rate. The annual Interest Credit will never be less than zero, and will not be more than the Index Cap Rate. The interest credit is calculated as follows:

The percentage change in the index value is determined as follows:

$$\text{Index Value Change} = \frac{\text{Ending Index Value} - \text{Beginning Index Value}}{\text{Beginning Index Value}}$$

$$\text{Interest Credit} = (\text{Index Return, not to exceed Index Cap Rate}) \times (\text{current Index Account Value})$$

$$\text{Index Account Value} = (\text{Current Index Account Value}) + \text{Interest Credit}$$

Any interest credit is then added to the APP-Cap Index Account Value.

EXAMPLE: APP-Cap Index Account with S&P 500®	SCENARIO A: Above Average Return	SCENARIO B: Average Return	SCENARIO C: Negative Return
Index Value change =	$\frac{1200 - 1000}{1000} = 20\%^*$	$\frac{1040 - 1000}{1000} = 4\%$	$\frac{900 - 1000}{1000} = -10\%$
Interest Credit =	$(0.05) \times \$106,000 = \$5,300$	$(0.04) \times \$106,000 = \$4,240$	$(-0.10) \times \$106,000 = \0^{**}
Index Account Value =	$\$106,000 + \$5,300 = \$111,300$	$\$106,000 + \$4,240 = \$110,240$	$\$106,000 + \$0 = \$106,000$

*Index Value change cannot exceed the Index Cap Rate, which is assumed to be 5% in this hypothetical example.

**The Interest Credit will never be less than zero.

Minimum Surrender Value

Hypothetical example assumes an annuity contract issued with an initial premium of \$100,000 and no partial withdrawals.

End of

Yr 1: \$88,375.00	Yr 3: \$90,151.34	Yr 5: \$91,963.38	Yr 7: \$93,811.84	Yr 9: \$95,697.46
Yr 2: \$89,258.75	Yr 4: \$91,052.85	Yr 6: \$92,883.01	Yr 8: \$94,749.96	Yr 10: \$96,654.44

The Minimum Surrender Value shown is a demonstration of guarantees assuming no interest credited to the contract and no partial surrenders.

in Box Above

My initials confirm that:

- **The North American Charter Plus 10 annuity is a long-term contract and a Surrender Charge up to 10% as well as a Market Value Adjustment (if applicable in my state) will apply during the 10-year Surrender Charge Period to any full surrender or any partial surrender taken that exceeds the penalty-free partial surrender amount.**
- **During the surrender charge period, withdrawals in excess of the penalty-free amount or a full surrender will incur a premium bonus recapture charge up to 100% in year one and 10% in year ten. This premium bonus recapture amount is in addition to any applicable Surrender Charges and/or Market Value Adjustments.**
- **I have reviewed pages 3-4 of this Disclosure and affirmatively acknowledge the Surrender Charges, Premium Bonus Recapture and Market Value Adjustment Formula applicable based on the state of issue.**
- **I understand a surrender during the Surrender Charge Period may result in loss of premium.**

Please mark an "X" in the box to the left if your agent provided you with a North American illustration for the North American Charter Plus 10. By checking this box an illustration will also be provided along with the issued annuity Contract.

Applicant: I am aware that an Annuity Buyer's Guide is available on the Company website. Index disclosure supplement:

S&P 500® Low Volatility Daily Risk Control 5% Index

S&P 500® Low Volatility Daily Risk Control 8% Index

(Please see your annuity disclosure for details.)

Thank you for considering a fixed index annuity from North American Company for Life and Health Insurance®. Upon issue, this is an annuity Contract between you and North American. It is an insurance Contract filed with the state insurance department. Therefore, this Contract is governed by state insurance laws and your state insurance department.

A North American fixed index annuity Contract offers you flexibility to choose how to allocate your premiums to determine the manner in which your Contract will earn interest. You may earn interest credits by linking to an external index and by selecting from our various interest crediting methods or by allocating your premium to the fixed account. North American annuity products offer you, the customer, flexibility and choice in determining how you wish to have your Contract premiums allocated. If you elect to place your premium in the index account, your interest credit will never be less than zero. If you elect to place your premium in the fixed account, a declared rate of interest will be credited each year.

A North American fixed index annuity contains a minimum guaranteed interest rate, backed by the financial strength of North American. The fixed account minimum guaranteed interest rate is set at issue and guaranteed for the entire term of the Contract.

If you elect to link your premiums and credited interest to an external index, your premiums are never invested directly in the external index. The investment performance of the external index that your premiums are linked to does not pass through to you as a security investment does. If it is a stock-based index you do not receive dividends. By linking to an external index you merely select the manner used to measure what your credited interest will be. You ultimately decide how to allocate your premiums and decide how interest credits to your Contract will be calculated. It is critical you understand how the components of your fixed index annuity work. There are two main aspects that factor in to determining the interest credits, the index account (crediting method) option and the index itself.

S&P 500® Low Volatility Daily Risk Control 5% – Ask your sales representative for availability in your state.

The S&P 500 Low Volatility Index is a separate index, which measures performance of the 100 least volatile stocks in the S&P 500. The S&P 500 Low Volatility Daily Risk Control 5% Index strives to create stable performance through managing volatility to a 5% target (i.e. risk control) on the S&P 500 Low Volatility Index. The S&P 500 Low Volatility Daily Risk Control 5% Index adds an element of risk control by allocating between stocks, as represented by the S&P 500 Low Volatility Index, and cash. Because this index is managed to a volatility target, the index performance will not match the underlying performance of the S&P 500 Low Volatility Index (typically the volatility control tends to reduce the rate of negative performance and positive performance of the underlying S&P 500 Low Volatility Index – thus creating more stabilized performance).

We reserve the right to add, remove or revise availability of the S&P 500 Low Volatility Daily Risk Control 5% index, or to substitute a different published benchmark should the Company, in its discretion, determine that the use of either index no longer is commercially reasonable. The S&P 500 Low Volatility Daily Risk Control 5% index does not constitute a purchase of or direct investment in the index, or in the underlying components of the index. All references to S&P 500 Low Volatility Daily Risk Control 5% index values are used with the permission of S&P Dow Jones Indices and have been provided for informational purposes only. S&P Dow Jones Indices accepts no liability or responsibility for the accuracy of the prices or the underlying components to which the prices may be referenced.

S&P 500® Low Volatility Daily Risk Control 8% – *Ask your sales representative for availability in your state.*

The S&P 500 Low Volatility Index is a separate index which measures performance of the 100 least volatile stocks in the S&P 500. The S&P 500 Low Volatility Daily Risk Control 8% Index strives to create stable performance through managing volatility to an 8% target (i.e. risk control) on the S&P 500 Low Volatility Index. The S&P 500 Low Volatility Daily Risk Control 8% Index adds an element of risk control by allocating between stocks, as represented by the S&P 500 Low Volatility Index, and cash. Because this index is managed to a volatility target, the index performance will not match the underlying performance of the S&P 500 Low Volatility Index (typically the volatility control tends to reduce the rate of negative performance and positive performance of the underlying S&P 500 Low Volatility Index – thus creating more stabilized performance).

We reserve the right to add, remove or revise availability of the S&P 500 Low Volatility Daily Risk Control 8% index, or to substitute a different published benchmark should the Company, in its discretion, determine that the use of either index no longer is commercially reasonable. The S&P 500 Low Volatility Daily Risk Control 8% index does not constitute a purchase of or direct investment in the index, or in the underlying components of the index. All references to S&P 500 Low Volatility Daily Risk Control 8% index values are used with the permission of S&P Dow Jones Indices and have been provided for informational purposes only. S&P Dow Jones Indices accepts no liability or responsibility for the accuracy of the prices or the underlying components to which the prices may be referenced.
