The Most Recent, Highest and Lowest rates use backcasting to show how the Strategy Options would have performed over 10-year periods out of the available live and back-tested historical index performance. These hypothetical examples are for informational purposes only and are not intended to predict future performance. The product returns assume that the initial participation rates were held constant for the entire period. Past performance is not indicative of nor does it guarantee future performance. It is likely that your results would be different based on future index performance and the declared participation rates, which may be higher or lower than at contract issue.

¹ Participation rates are the percentage of index performance you will receive if the index value increases during the term. If the underlying performance of an index is zero or negative, the interest credited to your contract will be zero.

² The strategy charge is known as a strategy charge annual percentage in the contract. The strategy charge amount is determined by the strategy charge for the applicable index account value multiplied by the index account value and is deducted on each contract anniversary from your index account value. This may result in an overall reduction of the accumulation value if the interest credit is less than the strategy charge.

³ Most Recent based on time period from 12/31/2013-12/31/2023 for all indices. Highest index growth period of 12/31/2010-12/31/2020 for Loomis Sayles Managed Futures Index, 12/31/2004 to 12/31/2014 for Research Affiliates[®] Global Multi-Asset Index, 12/31/2011-12/31/2021 for S&P 500 Low Volatility 5% ER Index and 12/31/2011-12/31/2021 for S&P PRISM Index. Lowest index growth period of 12/31/2013-12/31/2023 for Loomis Sayles Managed Futures Index, 12/31/2012 to 12/31/2022 for Research Affiliates[®] Global Multi-Asset Index 12/31/2006-12/31/2016 for S&P 500 Low Volatility 5% ER Index and 12/31/2003-12/31/2013 for S&P PRISM Index.

New business guidelines

Interest rates and interest credit factors (“rates”) can change after we receive applications and before we receive the premiums. In order to qualify for a rate hold, we must receive premium within 45 days of application received date. Rates will be based on more favorable rates between the application received date and premium received date. If the 45th day falls on a weekend or holiday, the premium must be received on the business day before the weekend or holiday. Rate hold only applies for the first contract year. In subsequent contract years, rates will be declared on the contract anniversary and will align with the effective date of the contract. These interest rates and interest credit factors are reflected on the annual statement.

Sammons Financial[®] is the marketing name for Sammons[®] Financial Group, Inc.’s member companies, including North American Company for Life and Health Insurance[®]. Annuities and life insurance are issued by, and product guarantees are solely the responsibility of, North American Company for Life and Health Insurance[®].

Insurance products issued by North American Company for Life and Health Insurance[®], West Des Moines, Iowa: The North American Secure HorizonSM Accelerator is issued on form NA1015A/ICC21-NA1015A (Contract), AE651A/ICC21-AE651A, AE652A/ICC21-AE652A, AE653A/ICC21-AE653A, AE654A/ICC21-AE654A, AE655A/ICC21-AE655A, AE682A/ICC23-AE682A, AE642A/ICC20-AE642A, AE638A/ICC21-AE638A, AE639A/ICC21-AE639A (riders/endorsements) or appropriate state variation. This product, its features and riders may not be available in all states or appropriate for all clients.

Annexus and their affiliated agencies are independently contracted with North American Company for Life and Health Insurance.

Fixed index annuities are not a direct investment in the stock market. They are long term insurance products with guarantees backed by the issuing company. They provide the potential for interest to be credited based in part on the performance of specific indices, without the risk of loss of premium due to market downturns or fluctuation. Although fixed index annuities guarantee no loss of premium due to market downturns, deductions from the accumulation value for optional benefit riders or strategy fees or charges associated with allocations to enhanced crediting methods could exceed interest credited to the accumulation value, which would result in loss of premium. They may not be appropriate for all clients. Interest credits to a fixed index annuity will not mirror the actual performance of the relevant index.

Premium bonus may be subject to a premium bonus recapture. Products that have premium bonuses may offer lower credited interest rates, lower index cap rates, lower participation rates and/or greater index margins than products that don’t offer a premium bonus. Over time and under certain scenarios the amount of the premium bonus may be offset by the lower credited interest rates, lower index cap rates, lower participation rates and/or greater index margins.

The following indices are managed to a volatility target, and as a result the index performance will not match the performance of any other index or the markets in general since volatility control tends to reduce both the rate of negative performance and positive performance of the underlying index, thereby creating more stabilized performance. The S&P 500[®] Low Volatility Daily Risk Control 5% Index ER has been in existence since 8/31/2011. The Research Affiliates[®] Global Multi-Asset Index has been in existence since 11/24/23. The Loomis Sayles Managed Futures has been in existence since 8/30/2021. The S&P PRISM Index has been in existence since 2/12/2018.
