The "S&P 500®", "S&P Multi-Asset Risk Control 5% Excess Return Index", and "S&P 500® Low Volatility Daily Risk Control 5% Index" Indices ("Indices") are products of S&P Dow Jones Indices LLC or its affiliates ("SPDJI") and have been licensed for use by North American Company for Life and Health Insurance ("the Company"). Standard & Poor's® and S&P® are registered trademarks of Standard & Poor's Financial Services LLC ("S&P"); Dow Jones® is a registered trademark of Dow Jones Trademark Holdings LLC ("Dow Jones"); and these trademarks have been licensed for use by SPDJI and sublicensed for certain purposes by the Company. North American's products are not sponsored, endorsed, sold or promoted by SPDJI, Dow Jones, S&P, or their respective affiliates and none of such parties make any representation regarding the advisability of investing in such product(s) nor do they have any liability for any errors, omissions, or interruptions of the Indices.

The Fidelity Multifactor Yield Index<sup>SM</sup> 5% ER (the "Index") is a multi-asset index, offering exposure to companies with attractive valuations, high quality profiles, positive momentum signals, lower volatility and higher dividend yield than the broader market, as well as U.S. treasuries, which may reduce volatility over time. Fidelity and its related marks are service marks of FMR LLC. Fidelity Product Services LLC ("FPS") has licensed this index for use for certain purposes to North American Company for Life and Health Insurance® (the "Company") on behalf of the Product. The Index is the exclusive property of FPS and is made and compiled without regard to the needs, including, but not limited to, the suitability needs, of the Company, the Product, or the Product's contract owners. The Product is not sold, sponsored, endorsed or promoted by FPS or any other party involved in, or related to, making or compiling the Index.

FPS does not make any warranty or representation as to the accuracy, completeness, or availability of the Index or information included in the Index and shall have no responsibility or liability for the impact of any inaccuracy, incompleteness, or unavailability of the Index or such information. Neither FPS nor any other party involved in, or related to, making or compiling the Index makes any representation or warranty, express or implied, to the Product contract owner, the Company, or any member of the public regarding the advisability of purchasing annuities generally or the Product particularly, the legality of the Product under applicable federal securities, state insurance and tax laws, the ability of the Product to track the performance of the Index, any other index or benchmark or general stock or bond market or other asset class performance, or the results, including, but not limited to, performance results, to be obtained by the Company, the Product, Product contract owners, or any other person or entity. FPS does not provide investment advice to the Company with respect to the Product, to the Product, or to Product contract owners. The Company exercises sole discretion in determining whether and how the Product will be linked to the value of the Index. FPS does not provide investment advice to the Product contract owners, or any other person or entity with respect to the Index and in no event shall any Product contract owner be deemed to be a client of FPS.

Neither FPS nor any other party involved in, or related to, making or compiling the Index has any obligation to continue to provide the Index to the Company with respect to the Product. In the event that the Index is no longer available to the Product or Product contract owners, the Company may seek to replace the Index with another suitable index, although there can be no assurance that one will be available.

Fidelity Product Services LLC disclaims all warranties, express or implied, including all warranties of merchantability or fitness for a particular purpose or use. Fidelity Product Services LLC shall have no responsibility or liability with respect to the Product.

Morgan Stanley Dynamic Global Index (the "Index") is the property of Morgan Stanley & Co. LLC.

Any product that is linked to the performance of the Index is not sponsored, endorsed, sold or promoted by Morgan Stanley & Co. LLC, or any of its affiliates (collectively, "Morgan Stanley"). Neither Morgan Stanley nor any other party (including without limitation any calculation agents or data providers) makes any representation or warranty, express or implied, regarding the advisability of purchasing this product. In no event shall Morgan Stanley have any liability for any special, punitive, indirect or consequential damages including lost profits, even if notified of the possibility of such damages. The Index is the exclusive property of Morgan Stanley. Morgan Stanley and the Index are service marks of Morgan Stanley and have been licensed for use for certain purposes. Neither Morgan Stanley nor any other party has or will have any obligation or liability to owners of this product in connection with the administration or marketing of this product, and neither Morgan Stanley nor any other party guarantees the accuracy and/or the completeness of the Index or any data included therein.

No purchaser, seller or holder of this product, or any other person or entity, should use or refer to any Morgan Stanley trade name, trademark or service mark to sponsor, endorse, market or promote this product, without first contacting Morgan Stanley to determine whether Morgan Stanley's permission is required. Under no circumstances may any person or entity claim any affiliation with Morgan Stanley without the prior written permission of Morgan Stanley.

In calculating the performance of the Index, Morgan Stanley deducts, on a daily basis, a servicing cost of 0.50% per annum. This reduces the positive change or increase the negative change in the Index level and thus decreases the return of any product linked to the Index. The volatility control calculation applied by Morgan Stanley as part of the Index's methodology may decrease the Index's performance and thus the return of any product linked to the Index. In addition, because the volatility control calculation is expected to reduce the overall volatility of the Index, it will also reduce the cost of hedging certain products linked to the Index.
