Annuities and life insurance are issued by, and product guarantees are solely the responsibility of North American Company for Life and Health Insurance.

Fixed index annuities are not a direct investment in the stock market. They are long term insurance products with guarantees backed by the issuing company. They provide the potential for interest to be credited based in part on the performance of specific indices, without the risk of loss of premium due to market downturns or fluctuation. Although fixed index annuities guarantee no loss of premium due to market downturns, deductions from the accumulation value for optional benefit riders or strategy fees or charges associated with allocations to enhanced crediting methods could exceed interest credited to the accumulation value, which would result in loss of premium. They may not be appropriate for all clients. Interest credits to a fixed index annuity will not mirror the actual performance of the relevant index.

Withdrawals taken prior to age 59 1/2 may be subject to IRS penalties.

1. Known as a strategy fee annual percentage in the contract. In exchange for the charge, an enhanced participation rate is received. The charge is multiplied by the number of years in the crediting term and is deducted once each term from the accumulated value allocated to the enhanced participation rate method. The charge will be deducted once each term at the earliest of any partial withdrawal that exceeds the penalty-free amount, a full surrender or the end of the term. The strategy charge will be deducted regardless of the interest credited to the contract and can lead to loss of premium in certain scenarios.
2. Known as guaranteed accumulation value true-up endorsement in the contract.
