The Fidelity Multifactor Yield IndexSM 5% ER

Expertise, diversification,
and consistency

Life insurance products are issued by North American Company for Life and Health Insurance®

The Fidelity Multifactor Yield IndexSM

5% ER

Designed to help deliver more consistent performance in various market conditions.

Growth potential

Market fluctuations seem to be the only constant these days. In addition to looking for death benefit protection, you may be searching for new ways to help manage this volatility, while also growing your policy's potential cash value.

One option is to harness the power of factors with the Fidelity Multifactor Yield Index 5% ER.

This rules-based index blends six equity factor indices with U.S. Treasuries and cash, using a dynamic allocation approach that seeks to reduce volatility to deliver more consistent returns over time.

North American offers two alternatives for policyowners to access the Fidelity Multifactor Yield Index 5% ER on all currently marketed and select inforce indexed universal life insurance products.

The Fidelity Multifactor Yield Index 5% ER is built on:

Expertise

Diversification

Consistency

The Fidelity Multifactor Yield Index 5% ER is ticker: FIDMFYDN.

Expertise

With 50+ years of quantitative investment experience, factor investing is a meaningful component of Fidelity's capabilities.

What is a factor?

A factor is a characteristic of a security that helps explain its risk and return behaviors. And when key factors are combined, they have the potential to outperform the broader market and lower overall risk.

Research team

- Over **100 quantitative investment professionals** across equity, fixed income, and asset allocation
- Provides expertise to retail, intermediary and institutional strategies

Tools and resources

- **3,000+ equity and fixed income** characteristics in the research library
 - Style factors
 - Macro factors
- Custom, proprietary risk-management tools

Factor-based strategies

- **13 Equity Exchange Traded Funds (ETFs) and 2 Fixed Income ETFs** with \$4.3B in assets under management
- **Over 60 proprietary factor indices** with indices supporting ETFs and mutual funds
- **Single factor and multifactor** active investment capabilities with \$3.9B across retail and institutional assets
- **7 dedicated factor funds** within managed accounts with \$36.4B in assets under management

Diversification

Certain factors have tended to perform well in varying market environments, but no single factor outperforms all the time, so combining factors may provide diversification benefits.

Combination of six key factors

Supported by years of academic research and empirical data, six equity factor indices were combined to create the Fidelity Multifactor Yield Index 5% ER. Each factor and weighting was chosen with the goal of enhancing returns, managing risk, and targeting specific outcomes.

Factors within the Fidelity Multifactor Yield Index 5% ER

	Value	Momentum	Dividend yield	Quality	Low volatility	Size
What it is	Securities that are inexpensive relative to fundamentals	Positively trending securities	Securities that pay higher dividends	Financially healthy companies	Lower-risk securities	Smaller, potentially more agile companies
Underlying index name	Fidelity U.S. Value Factor Index SM (FIDUSVLT)	Fidelity U.S. Momentum Factor Index SM (FIDUSMOT)	Fidelity High Dividend Index SM (FIDUSCDT)	Fidelity U.S. Quality Factor Index SM (FIDUSQLT)	Fidelity U.S. Low Volatility Factor Index SM (FIDUSLVT)	Fidelity Small-Mid Factor Index SM (FIDUSSMT)

Weighted to enhance income potential

A portfolio of six equity factors weighted with a tilt toward dividend yield may produce higher returns than an equally weighted portfolio, while still providing the benefits of diversification with exposure to the other factors.

The Fidelity Multifactor Yield 5% ER works to optimize income potential by applying fixed weights to six Fidelity factor indices.

Factors can provide diversification

Factors have been shown to enhance portfolios over time, but no single factor works all the time. Since factors are not highly correlated with each other, they may perform differently in varying environments, which could allow consumers to benefit from diversification.

The performance shown does not represent any Fidelity strategy or client account and is no indication of any future performance of any such products or accounts.

Past performance is not guarantee of future results. Methodology: All factor portfolio returns shown are equal-weighted and sector neutral. Factor portfolios and indexes assume the reinvestment of dividends and exclude fees and other implementation costs. Russell 1000 Index is equal-weighted. Size (small cap) returns are annualized returns of the equal-weighted bottom quintile (by market capitalization) of the Russell 1000 Index. Value composite returns shown are annualized returns of a combined average ranking of stocks in the equal-weighted top quintile (by book/price ratio) and stocks in the top quintile (by earnings yield) of the Russell 1000 Index. Momentum returns are annualized returns of the equal weighted top quintile (by trailing 12-month returns) of the Russell 1000 Index. Quality returns are annualized returns of the equal-weighted top quintile (by return on equity) of the Russell 1000 Index. Return on equity is a measure of profitability that calculates how many dollars of profit a company generates with each dollar of shareholder's equity. Low-volatility returns are annualized returns of the equal-weighted bottom quintile (by standard deviation of weekly price returns) of the Russell 1000 Index. Standard deviation is a measure of return dispersion. A portfolio with a lower standard deviation exhibits less return volatility. Dividend yield returns are annualized returns of the equal-weighted top quintile (by dividend yield) of the Russell 1000 Index.

Diversification does not ensure a profit or guarantee against a loss.

Consistency

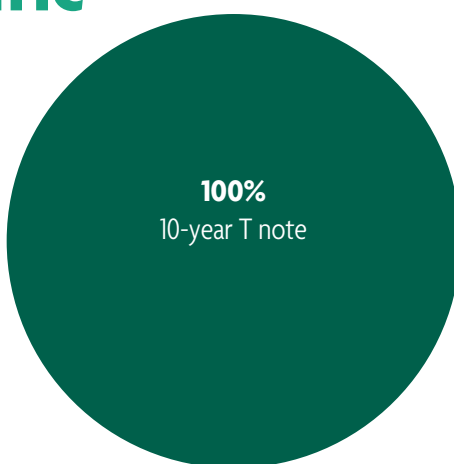

Volatility control combined with certain factors may achieve performance consistency in various market conditions.

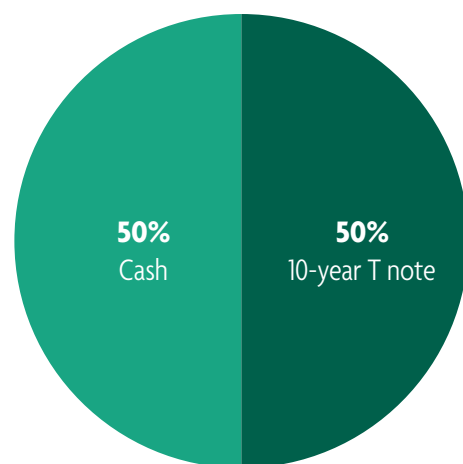

Targets a specific volatility

The Fidelity Multifactor Yield Index 5% ER applies a fixed income overlay to help achieve a 5% volatility target. To manage this target, it allocates between 10-year treasuries and cash, based on the performance trend in the prior three months, and adjusts allocations daily.

This volatility control mechanism, along with the combination of factors, can help the Multifactor Yield Index 5% ER achieve performance consistency in various market conditions.

When performance trend is
positive

When performance trend is
negative

The Fidelity Multifactor Yield Index 5% ER is just one of the many index options available through North American. To learn more about North American's life insurance products, please contact your financial professional.

North American is a Sammons Financial company.

We are committed to our customers, distribution partners, employees and communities – and the deeply rooted belief that we grow stronger together.

With so much change happening in the world, people are looking for companies that can stand the test of time. They need a partner that can weather life's storms. That's us. For over a century, we have been here for our customers and honoring our commitments. And because we're privately owned, we don't measure our impact by the number of years we've been in business, investor goals or size of the company. We are proud of our impact of the financial futures we help secure, and the legacies we help establish.

We believe that we aren't here to serve just today's customers, but customers for generations to come. As we look ahead to our next hundred years, that fundamental principle remains rich in its vision. No matter how much change happens in the world around us, we will find new ways to create value for our customers.

Just like always.

North American has continued to earn high ratings, based on our financial strength, operating performance, and ability to meet obligations to our policyholders and contract holders. North American currently holds the following ratings:

“A+”

A.M. Best² (Superior) (Second category of 15)

S&P Global Ratings² (Strong) (Fifth category of 22)

Fitch Ratings² (Stable) (Fifth category of 19)
