

One client, multiple opportunities

Finding the next sale is always on the running to-do list. Life insurance sales that are traditionally one-and-done aren't always the right solution for your clients—or your business.

The problem

Your client may be:

- Underinsured or uninsured
- Planning for retirement needs
- Unsure what future tax rates will be

Tools for the process

Establishing the need for life insurance can be straightforward with tools like our income protection guide and DIME worksheet. Here's the challenge: helping the client find the premium to fund their policy without impacting their current lifestyle. Use our cash flow worksheet to identify areas where premium could come from.

The Builder Plus IUL 4 and ADDvantage Term policies offer a unique opportunity to evolve with your client's needs. As your client's life circumstances change, so can their coverage. This chart illustrates what occurs as your client converts portions of their term policy into their IUL. Each conversion provides your client with increased potential retirement income and you, the agent, with additional compensation. Plus, conversions don't have to go through underwriting.

Use your annual reviews as a time to ensure the current death benefit split between the two policies is appropriate for your client's needs or recommend a conversion.

The net cost of a Fixed Interest Participating Policy Loan could be negative if the credits earned are less than the interest charged. The net cost of the loan could also be larger than under standard policy loans if the amount credited is less than the interest charged. In the extreme example, the amount credited could be zero and the net cost of the loan would equal the maximum interest rate charged less any guaranteed bonus. In brief, fixed interest rate loans have more uncertainty than standard policy loans in the interest rate credited.
